ABSTRACT

10

Interfacing module and telecommunication device
with a long line connection possibility to a LAN,
including such a module

15

The present invention concerns an interfacing module and a
telecommunication device with a long line connection possibility to a
LAN including such a module.

20

Interfacing module for coupling at least one telecommunication device
to a local area network LAN, wherein said module (2) contains means
for converting reciprocally data from a LAN compatible protocol into
a dedicated protocol adapted for long distance line transmission and
identical to the protocol used by the concerned telecommunication
device(s) (1) or at least compatible with it.
